Follow these steps to keep MILK COLD:

- **Monitor** milk temperatures daily
- **Close** cooler doors
- **Check** temperature at delivery and move to cooler immediately
- **Place** milk away from walk-in cooler doors
- **Keep** milk in cooler during meal service
- **Consider** forced air coolers or glass door merchandisers
- **Allow** for air circulation in cooler; do not overload
- **Clean** cooler vents regularly
- **Replace** worn gaskets

*Milk tastes best when it’s served cold, between 35°F and 40°F!"
