Honoring the Harvest is about using food for its highest purpose - to nourish people - and moving nutrients through the food system from people, to animals and back to the land to grow more food rather than going to waste in a landfill.

In a typical week, an average American family of four purchases approximately 96 lbs. of food, and of that 22 lbs. (about 23%) go to waste in the home.

That's almost like buying four bags of groceries and tossing one in the trash!

BECOME A FOOD WASTE WARRIOR

Take these simple steps:

- Start with meal planning
- Buy and eat just what you need
- Make the most of leftovers
- Master food storage

Pay it forward:

A family of four that buys and eats just what they need would save approximately \$4.06 a day, which adds up to \$1,484 per vea

If you do have extra food, donate it to those in need in your local community

• The savings can be put to good use

for your family or your community.

Just half the annual savings would

be enough to provide food-insecure

neighbors with up to 8.162 meals

PEOPLE FACE FOOD INSECURITY IN EVERY COMMUNITY IN THE COUNTRY 1 in 6 **CHILDREN IN THE U.S.**

LIVED IN FOOD-INSECURE **HOUSEHOLDS IN 2015**

20 families working together

in the same way

Help the planet, too:

provided is based on donation to Feeding America (www.feedingamerica.org/ways-to-give/); number of meals can vary by location. Help the planet Reduction in carbon footprint is based on EPA WARM report, 2016, www.epa.gov/sites/production/files/2016-03/documents/warm_v14_organic_materials.pdf.

Reducing food waste keeps food out of landfills, conserving valuable resources and reducing methane emissions.

A family of four that buys and eats iust what they need could reduce its annual carbon footprint by

through food banks.

That's like driving FEWER MILES PER YEAR
