Milk's Journey
Farm
TO Fridge

October 26
1:00 pm

[Register Here](#)

Did you know that milk goes from farm to grocery store in about 48 hours, 365 days a year? Learn about each step of milk's journey from the farm to your table. This webinar will address how milk is transported from the farm to the processing plant to the grocery store and what happens each step along the way before it gets to your fridge. We'll explore the various types of milk products you can buy, and which ones are right for you and your clients. We'll also review "sell by" and "use by" dates and how to keep your milk fresh at home.

During the session, participants will:

- 1** Learn about milk's journey from the farm to your table, including transportation, processing, and quality control to ensure freshness, purity and taste.
- 2** Explore different fluid milk products that you find at the grocery store and what products are best for you and your clients.
- 3** Learn about "use by" and "sell by" dates on milk and how to keep your milk fresh at home.
